

Intro To Human-Computer Interaction

#4: Consistency and Standards

- People spend more time using *other products* than *your* product
- Users should not have to wonder whether different words, situations, or actions mean the same thing. Follow platform and industry conventions.
- Your "clever" solution can cause confusion

I'm Looking at YOU, Microsoft

Undo Typing ⌘ Z

Redo Typing ⌘ Y

Cut ⌘ X

Copy ⌘ C

Paste ⌘ V

Paste Special... ^ ⌘ V

Paste and Match Formatting ⇧ ⌘ V

Clear >

Select All ⌘ A

Find >

Links...

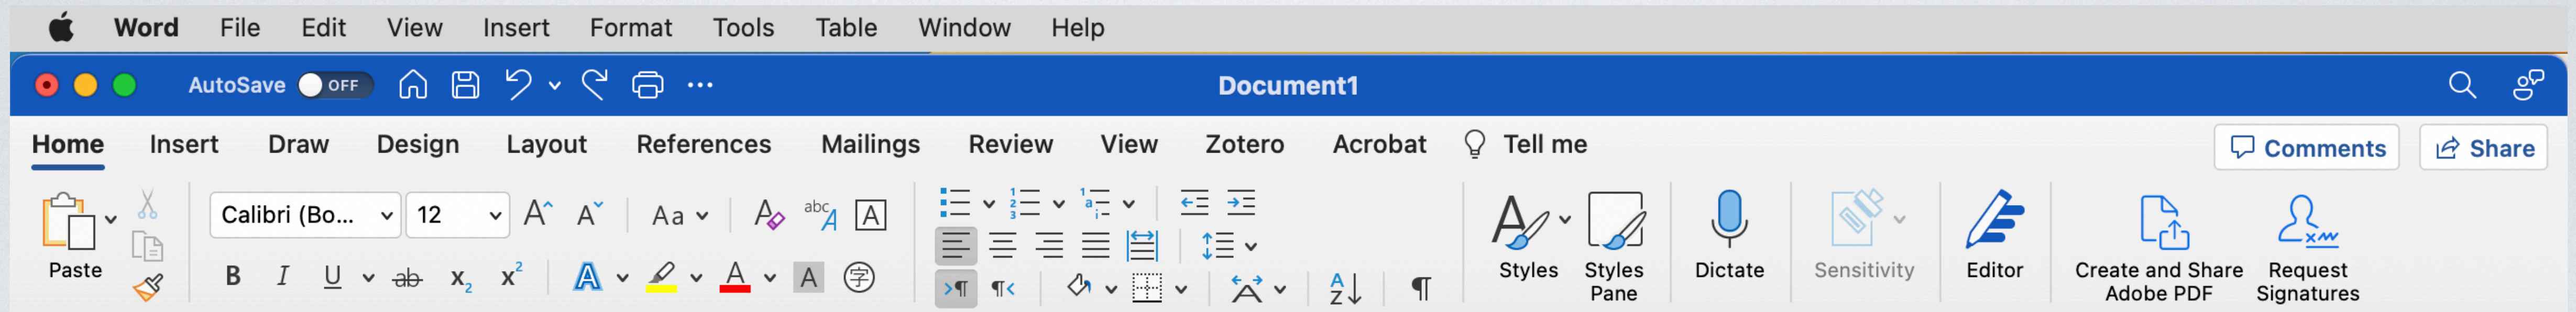

Mac standard for Redo is ⌘ Z

I'm STILL Looking at You, Microsoft

- ^A should move cursor to beginning of line (broken in Microsoft apps)
- Likewise ^E (end of line)

Not Just Shortcuts

- Two (!??) menu bars, THREE different sections of buttons

Error Prevention

- Good error messages are important, but the best designs carefully prevent problems from occurring in the first place. Either eliminate error-prone conditions, or check for them and present users with a confirmation option before they commit to the action.

Southwest

- Can't set return date before departure date

Return date

January 2023

S	M	T	W	T	F	S
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

February 2023

S	M	T	W	T	F	S
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28				

We are currently accepting air reservations through August 14, 2023.
On February 9, 2023 we will open our schedule for sale through October 4, 2023.
This date is subject to change! Please check back frequently.

#6: Recognition Rather Than Recall

- Minimize the user's memory load by making elements, actions, and options visible. The user should not have to remember information from one part of the interface to another. Information required to use the design (e.g. field labels or menu items) should be visible or easily retrievable when needed.

Command Line vs. GUI

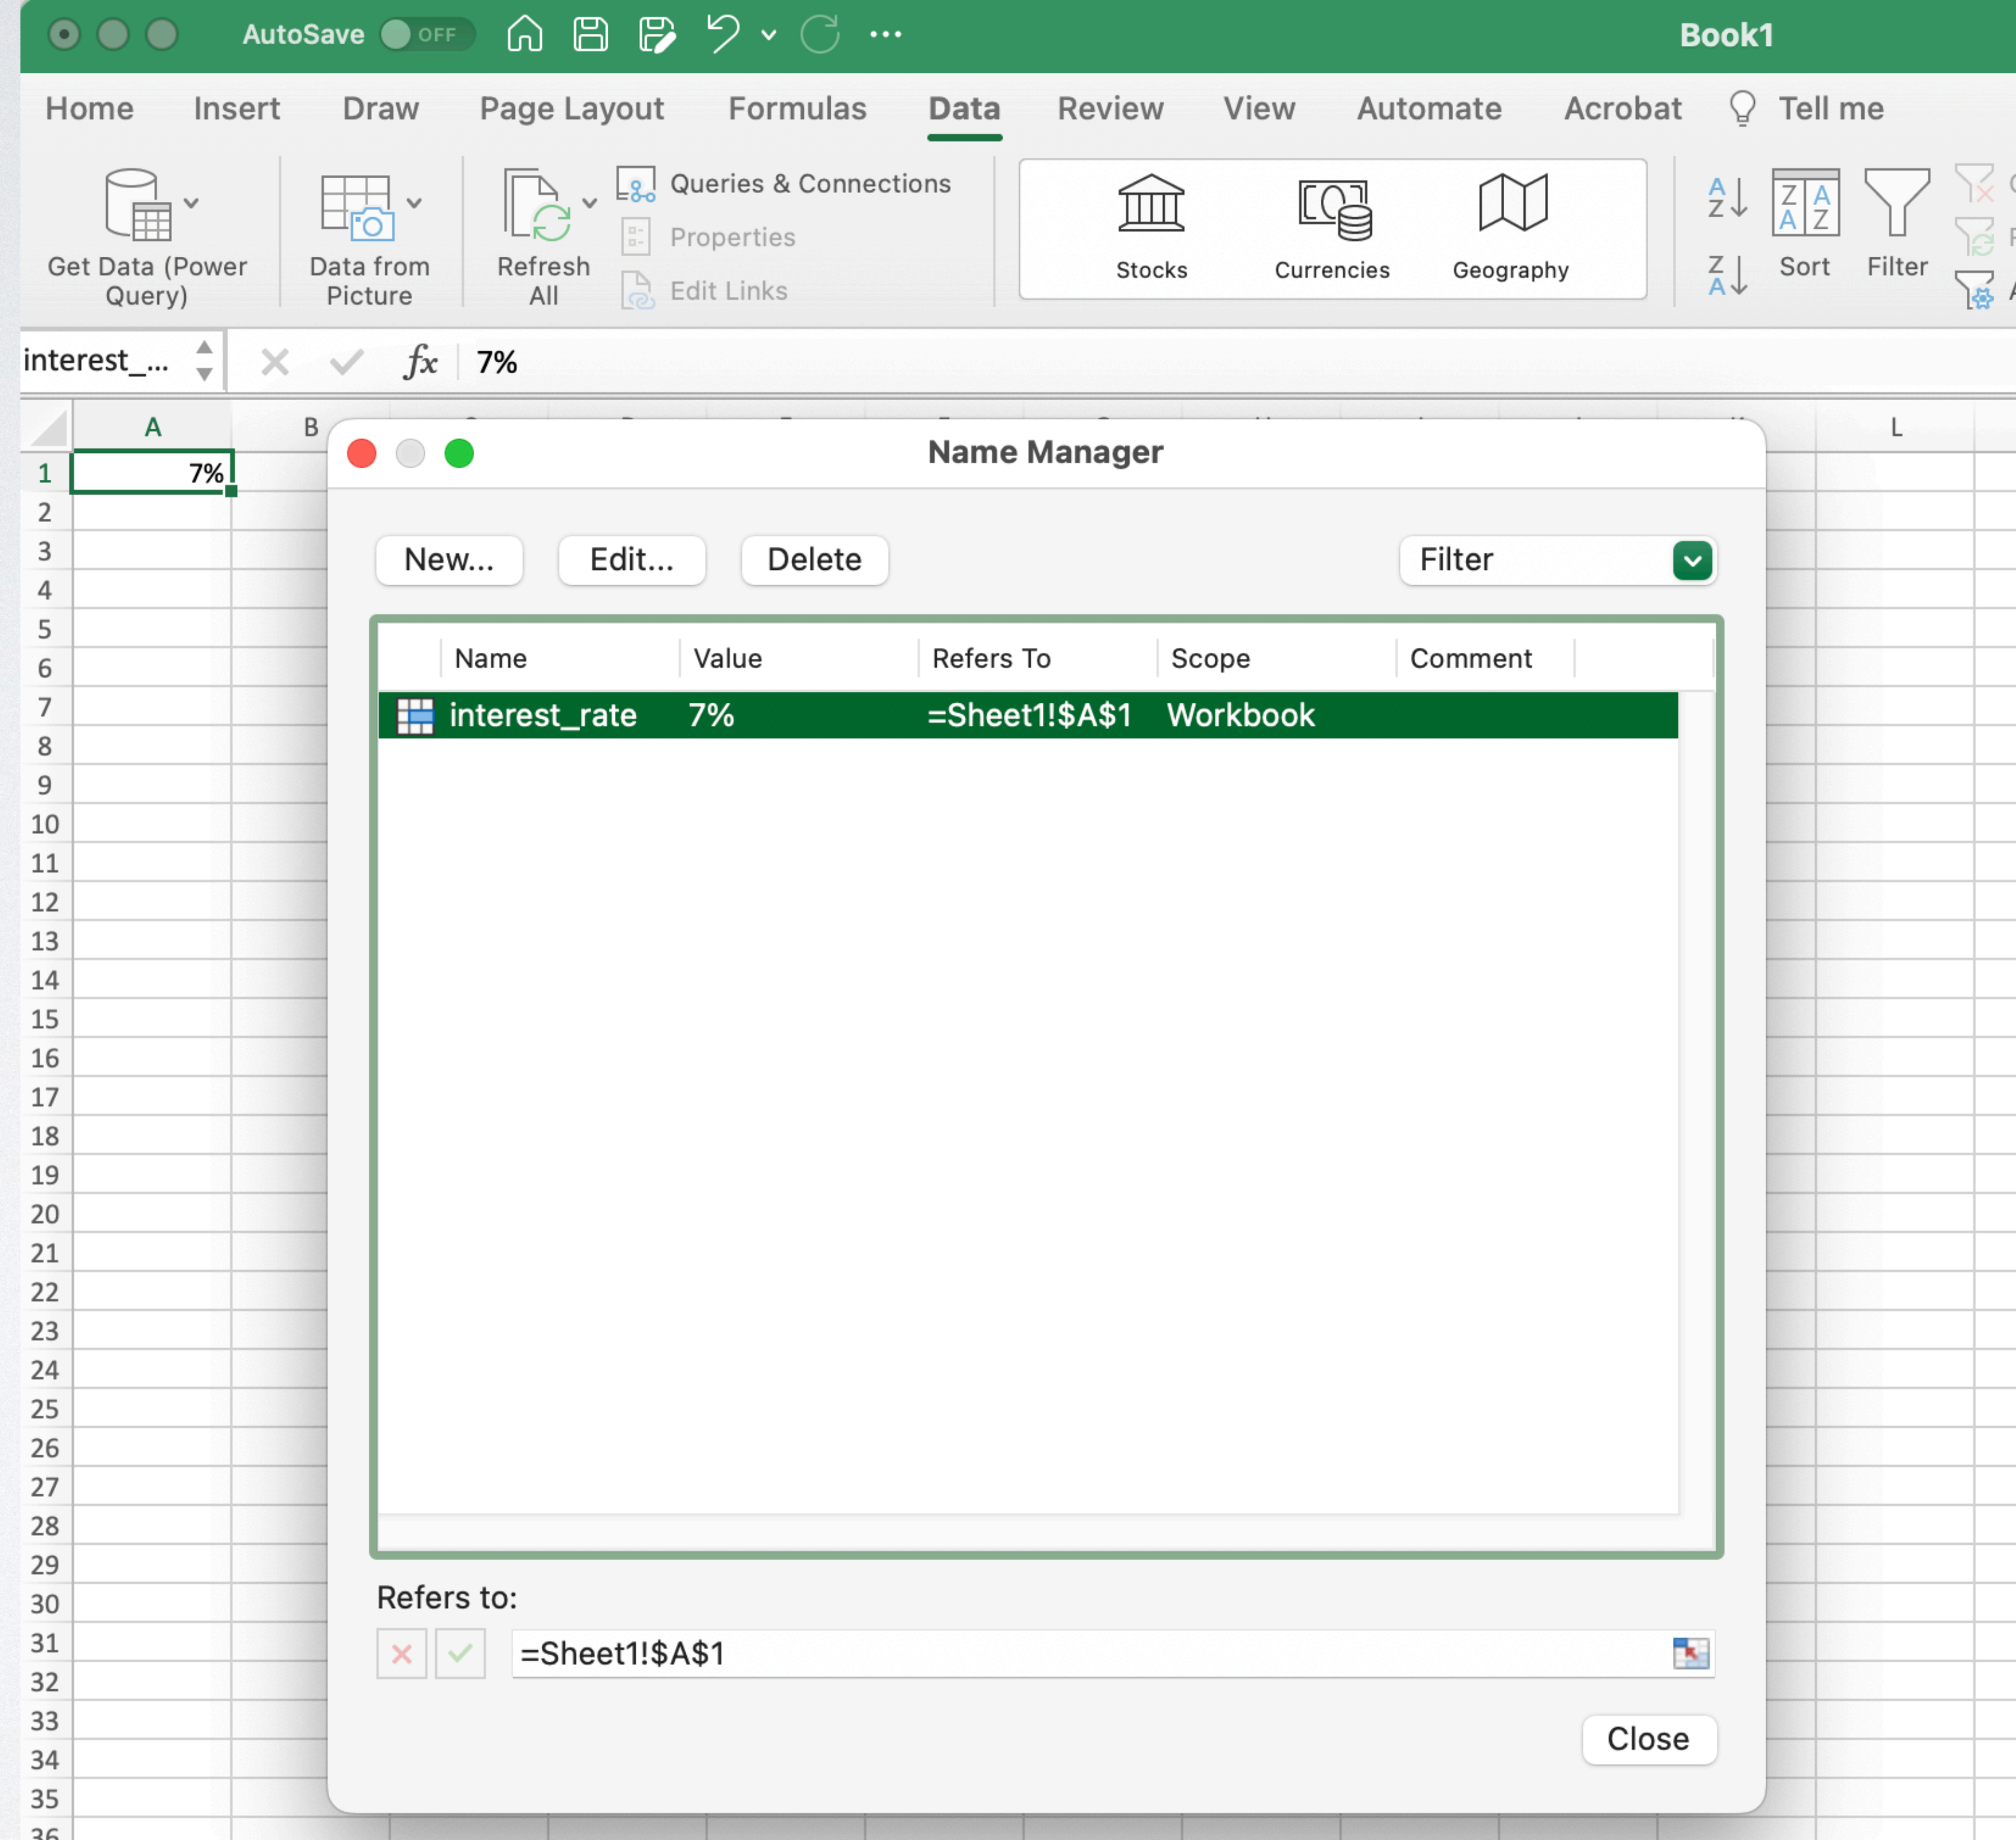

- Command line requires you to remember command names
- GUI gives you lists of possible commands in menus

Capitals

- What's the capital of Portugal?
- Is Lisbon the capital of Portugal?

Excel Name Manager

- Can't see the list of named ranges in the formula editor or in the table
- Instead, use the "Name Manager": a modal dialog box!
- Close the box. What were the names, again?

#7: Flexibility and Efficiency of Use

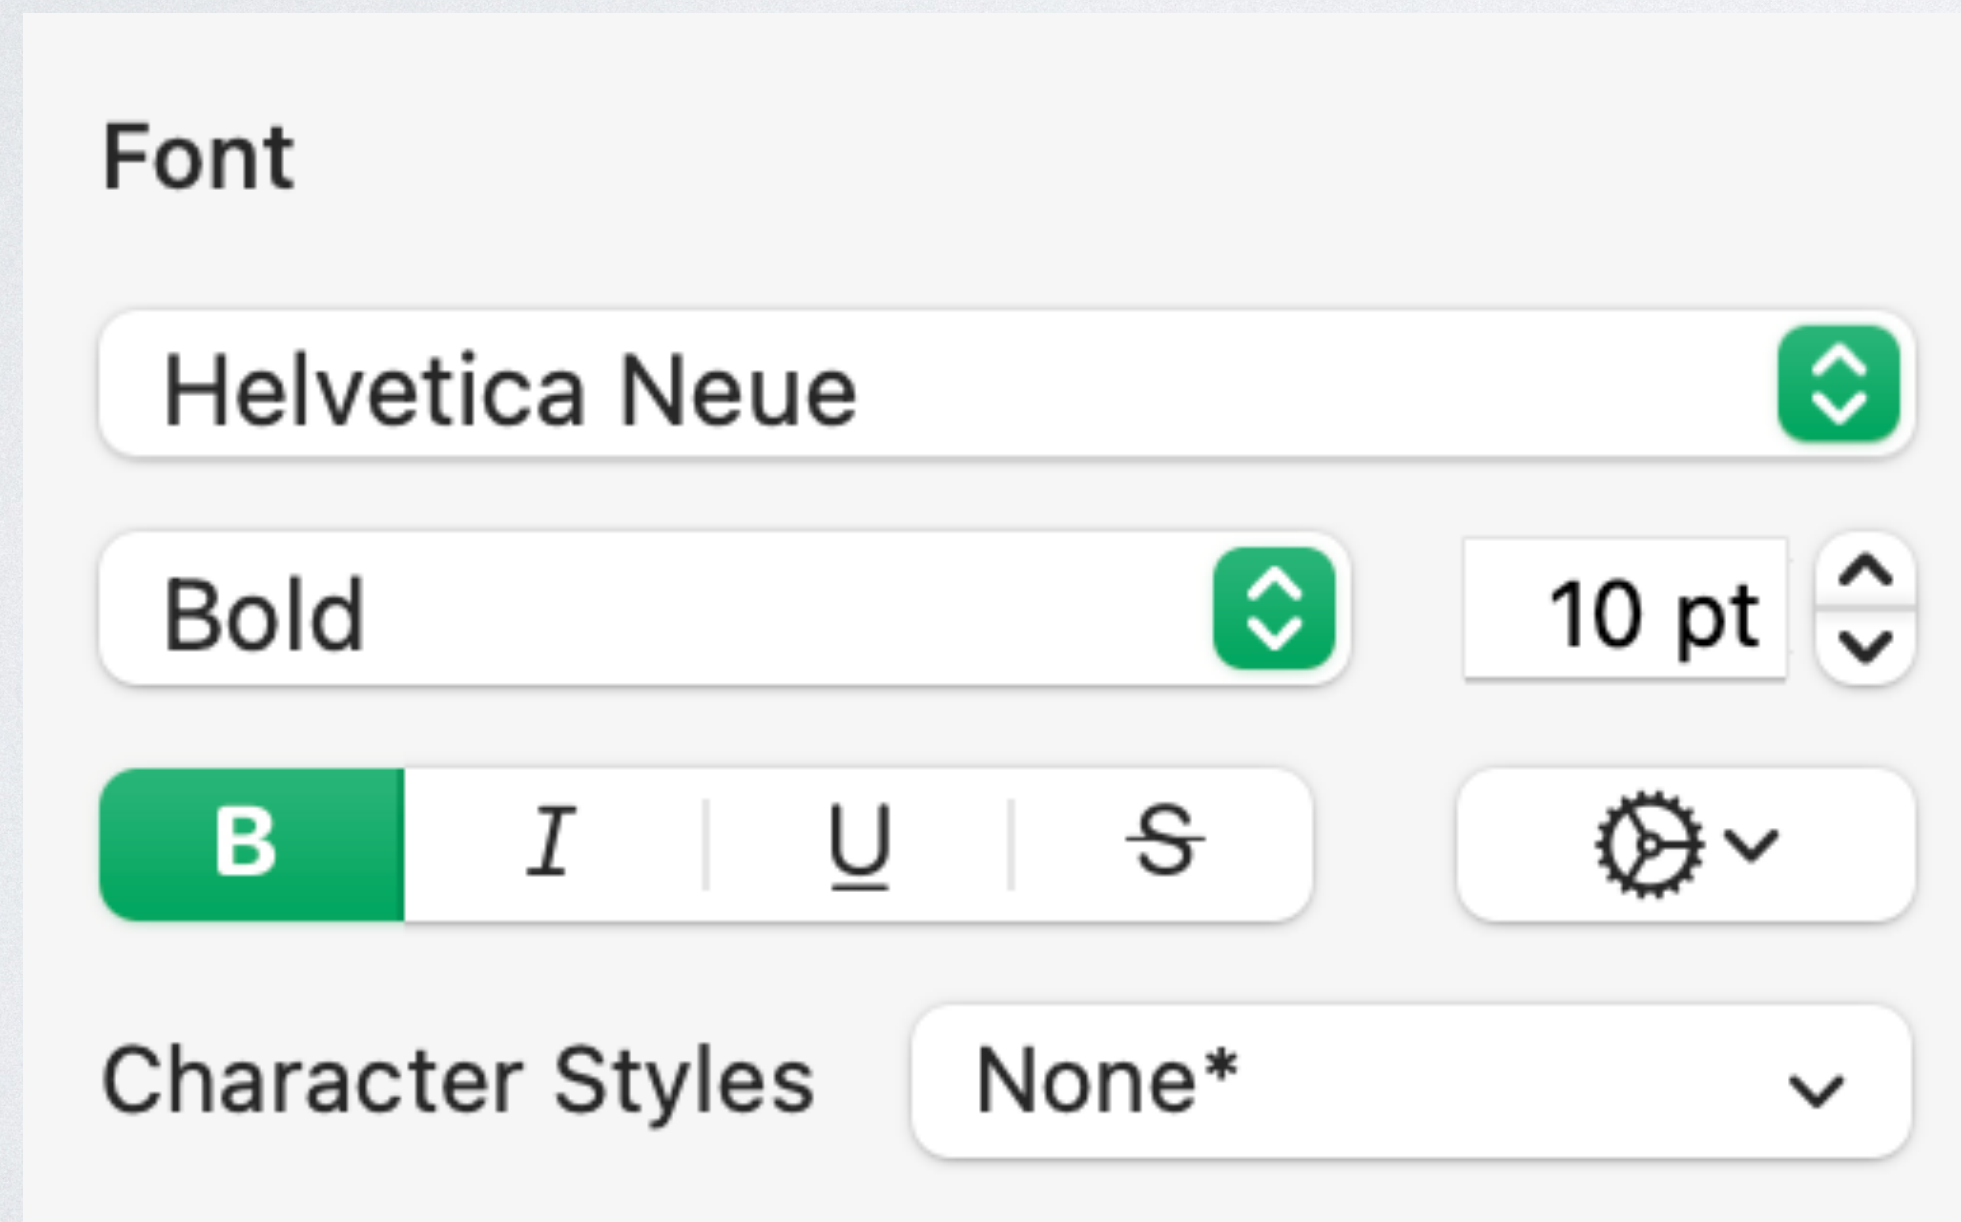

- "Shortcuts — hidden from novice users — may speed up the interaction for the expert user so that the design can cater to both inexperienced and experienced users. Allow users to tailor frequent actions."
- Novices and experts have different needs
 - Novices need *discoverability*
 - Experts need *efficiency*

Sending Lots of Similar Emails

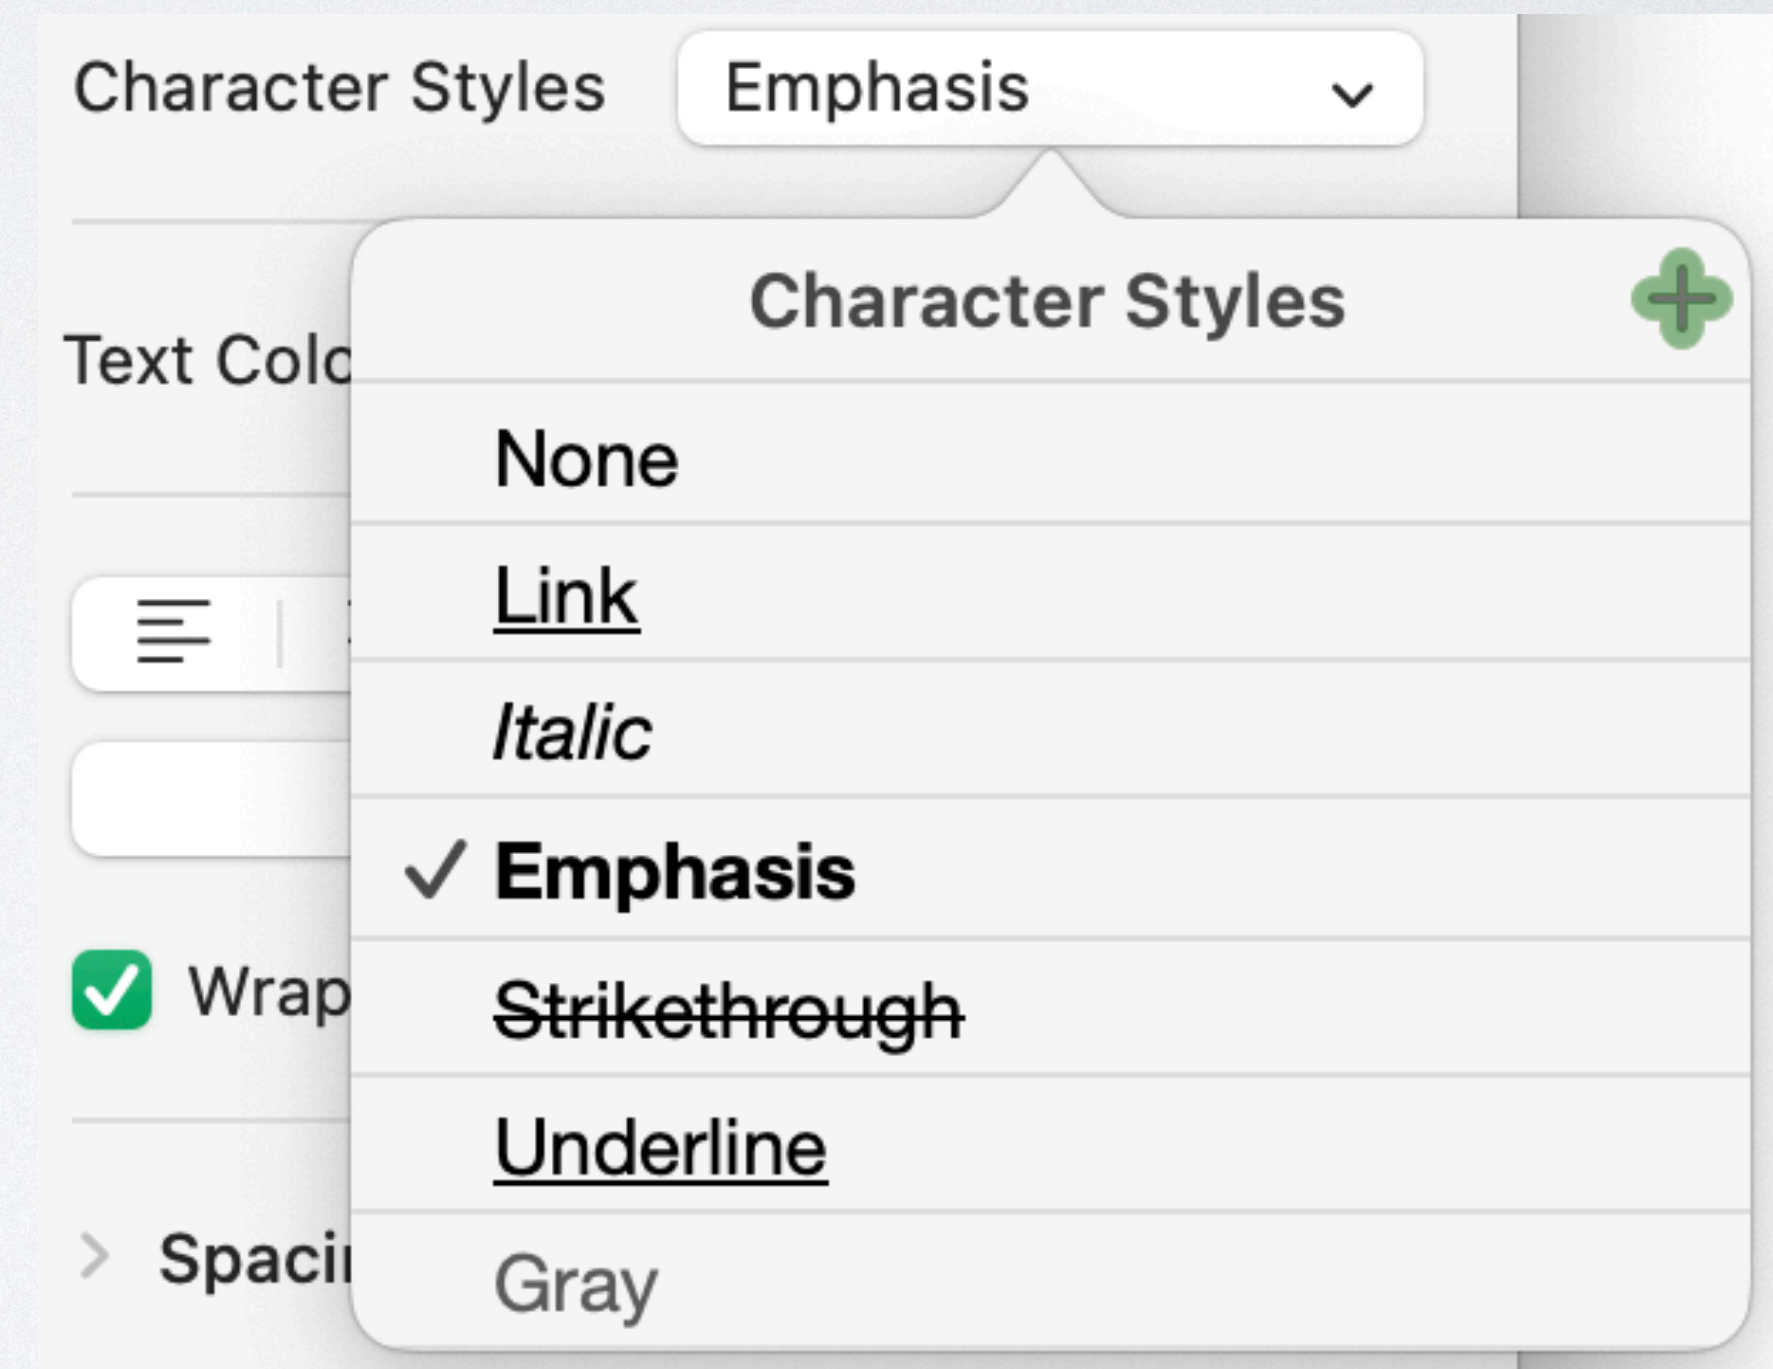

- Retype?
- Copy/paste, modify?
- Standardize, use CC/BCC?
- Mail merge
- Fancy CRM tool

Multiple Methods for One Task

- **To make text bold:**

- ⌘B

Is More Better?

- Perl motto: "There's more than one way to do it."
- Using a language feature forces maintainers of the code to understand that feature
- But no one cares whether you clicked or used ⌘B to make text bold

#8: Aesthetic and Minimalist Design

- "Interfaces should not contain information that is irrelevant or rarely needed. Every extra unit of information in an interface competes with the relevant units of information and diminishes their relative visibility."

Introduction

WHO IS AN ARCHITECT (INTJ)?

An **Architect (INTJ)** is a person with the [Introverted](#), [Intuitive](#), [Thinking](#), and [Judging](#) personality traits. These thoughtful tacticians love perfecting the details of life, applying creativity and rationality to everything they do. Their inner world is often a private, complex one.

"Thought constitutes the greatness of man. Man is a reed, the feeblest thing in nature, but he is a thinking reed"

#9: Help Users Recognize, Diagnose, and Recover From Errors

- Error messages should be expressed in plain language (no error codes), precisely indicate the problem, and constructively suggest a solution.

Sorry, a system error occurred.

Woopsie Daisy!

Looks like something went completely wrong! but don't worry

It can happen to the best of us, and it just happened to you

[Go To Homepage](#)

- Cutesy language is annoying
- Not clear what's wrong or how to fix it
- You probably just lost what you typed (sorry, not sorry)

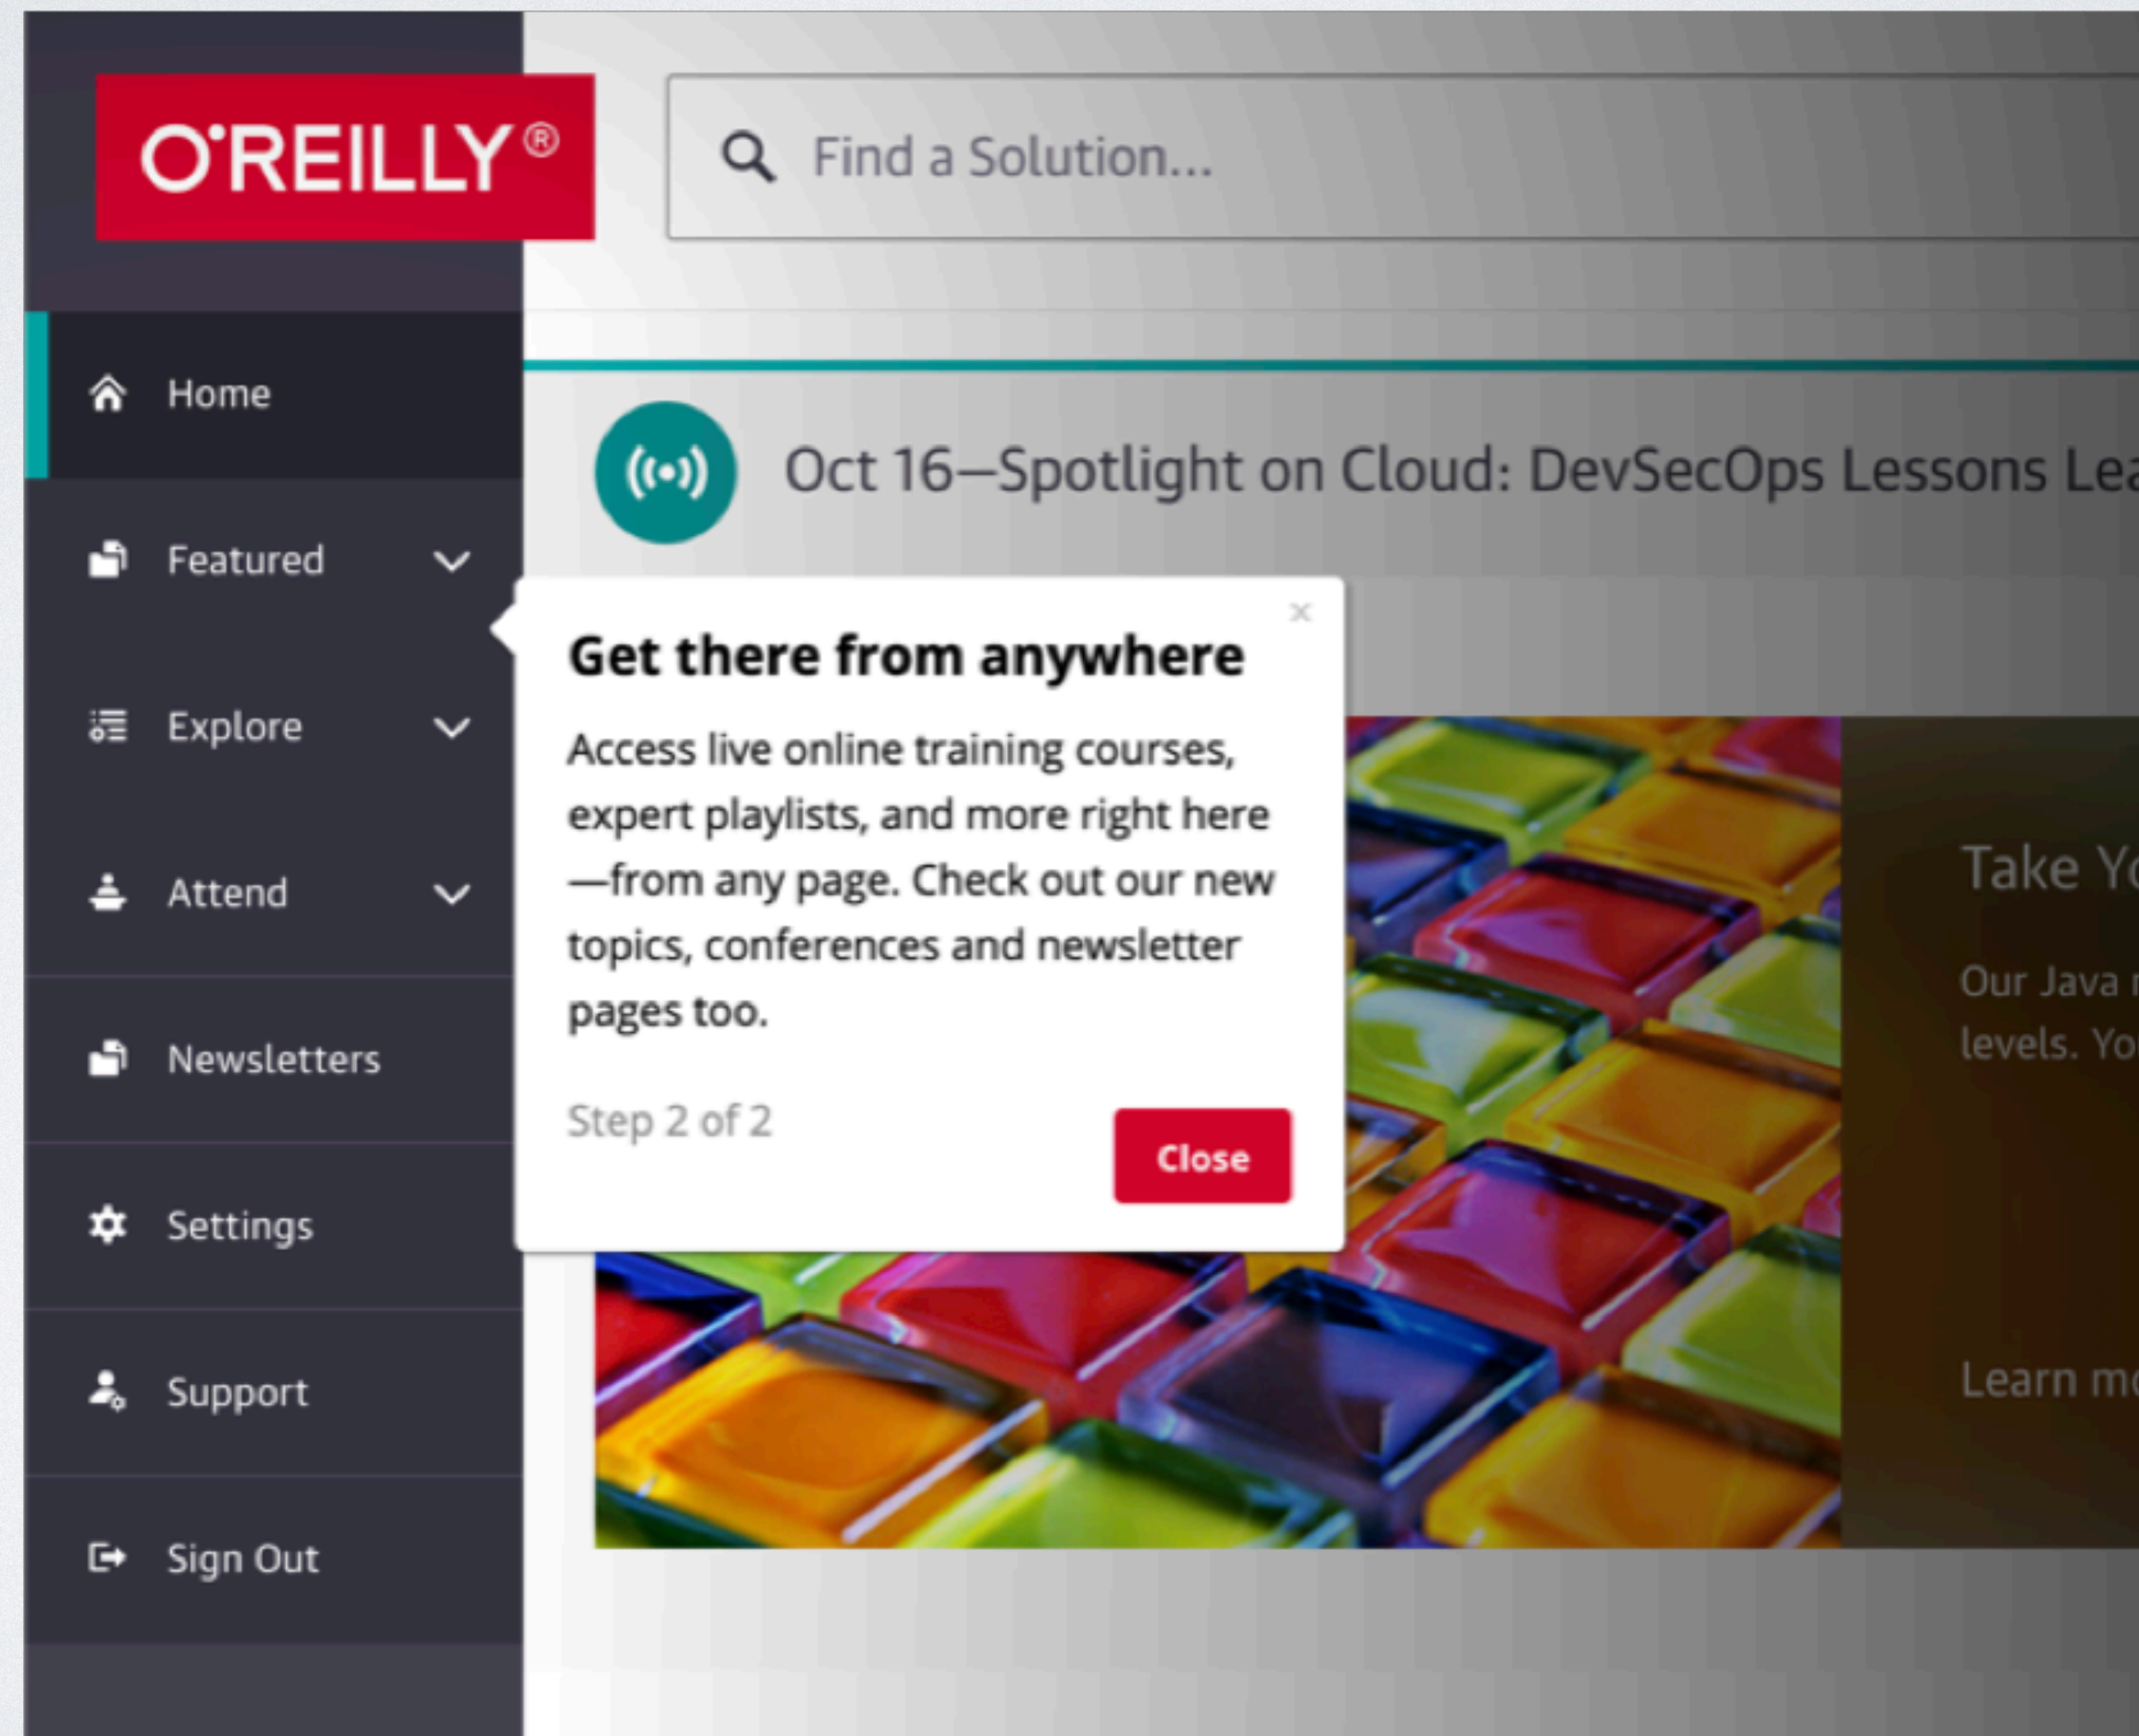

10: Help and Documentation

- It's best if the system doesn't need any additional explanation. However, it may be necessary to provide documentation to help users understand how to complete their tasks.
- Enable search in documentation
- Present documentation in context

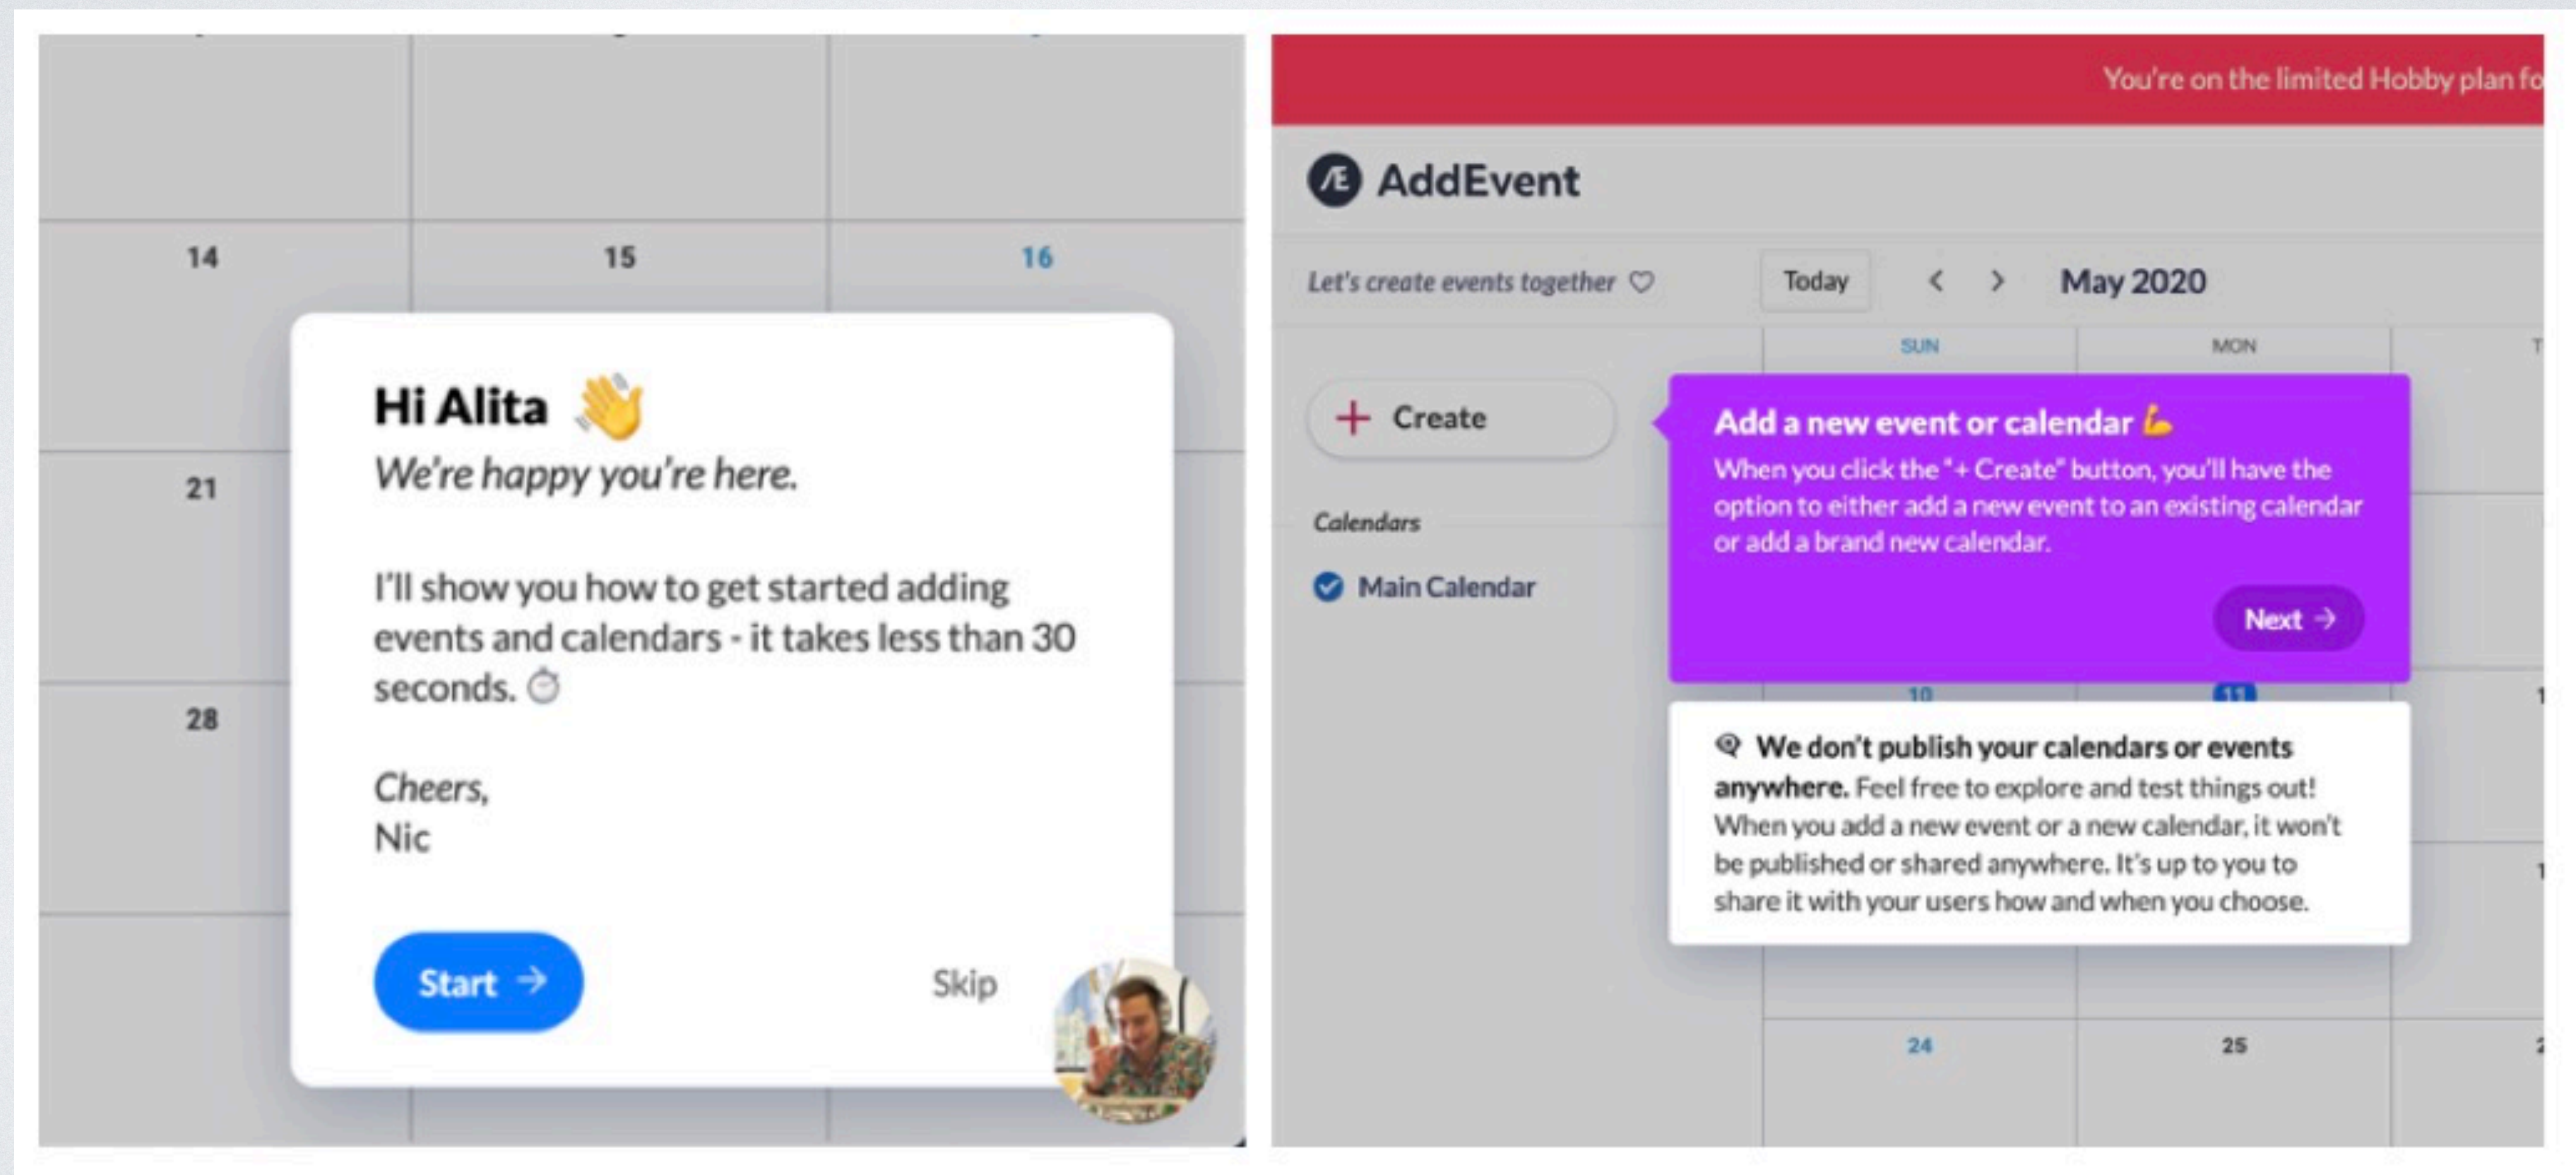

Proactive vs Reactive Help

- Proactive: help before people get stuck (e.g., tutorials)
 - Push: not relevant to user's goals
 - Pull: Just in time
- Reactive: answer questions, troubleshoot problems

Push Revelations

Pull Revelations

Activity

- In small groups, do a heuristic evaluation of an app of your choice.
- Try to find problems that you think might present significant usability challenges to users.
